CERTIFICATE

Name :

Register No :

Certified that this is a bonafide record of work done by the candidate in
the semester of B.E. / B. Tech.
in the Laboratory during the year.....

Lab. In-charge

Head of the Department

This record is submitted for Anna University practical examination
held on.....

Internal Examiner

External Examiner

Instructions to be followed in maintaining the Record Book

- A.
 - 1. The Record of an experiment should be submitted on the day the students come to the same laboratory to perform the next experiment.
 - 2. Only such experiments as done by the candidate should be recorded in the order in which they are done.
- B. The Record should be written neatly in ink / pencil, and the diagrams should be drawn neatly with pencil.
- C. Every experiment should begin on a new page.
- D. The right hand page should contain:
 - 1. Experiment Number in the margin at the top followed by date of performance of the experiment.
 - 2. Title of the experiment on the first line followed by :
 - (i) Aim of the experiment.
 - (ii) Apparatus required.
 - (iii) Formula, if any and expansion of the terms.
 - (iv) Principle, if any.
 - (v) Description.
 - (vi) Procedure (including precautions).
 - (vii) Results.
- E. The left hand page should contain the following in the same order :-
 - 1. Diagram of the apparatus, if any.
 - 2. Circuit diagram, if any.
 - 3. Observation, if any, in tabular form.
 - 4. Calculations, if any.

READING COMPREHENSION

The History of Chocolate

Chocolate has a rich and fascinating history that dates back thousands of years. The earliest known use of cacao dates to around 1900 BC by the Olmec civilization in present-day Mexico. The Olmecs, and later the Maya and Aztecs, used cacao beans to make a bitter beverage often mixed with spices and used in religious ceremonies. Cacao beans were even used as currency by the Aztecs.

When Spanish explorers arrived in the Americas in the 1500s, they brought cacao beans back to Europe. At first, Europeans also consumed it as a bitter drink, but they eventually began adding sugar, milk, and cinnamon to make it more appealing. Over time, chocolate evolved into the sweet treat we know today.

The industrial revolution transformed chocolate production. Machines allowed chocolate to be mass-produced, making it more accessible to people around the world. In 1847, the first solid chocolate bar was created in England. Later, in 1875, milk chocolate was invented in Switzerland by combining cocoa with condensed milk.

Today, chocolate is enjoyed worldwide in many forms—from bars and truffles to drinks and desserts. However, the chocolate industry faces challenges such as fair wages for cacao farmers and sustainable farming practices. Many companies now support fair trade and environmentally friendly methods to ensure the future of chocolate production.

Questions

Multiple Choice (Choose the correct answer):

1. Which civilization was one of the first to use cacao?
A. Egyptians
B. Olmecs
C. Romans
D. Greeks

Answer: B. Olmecs

2. How did the Aztecs use cacao beans?
A. For making jewellery
B. As perfume
C. As currency and in religious ceremonies
D. For farming tools

Answer: C. As currency and in religious ceremonies

3. When did chocolate first arrive in Europe?
A. 1300s
B. 1500s
C. 1700s
D. 1900s

Answer: B. 1500s

4. What was added to chocolate in Europe to make it more appealing?
A. Salt
B. Vinegar

- C. Sugar and milk
- D. Oil and garlic

Answer: C. Sugar and milk

5. Who invented milk chocolate?
- A. An English inventor
 - B. An American farmer
 - C. A Swiss chocolatier
 - D. A French chef

Answer: C. A Swiss chocolatier

6. In what year was the first solid chocolate bar made?
- A. 1647
 - B. 1747
 - C. 1847
 - D. 1947

Answer: C. 1847

True or False:

7. The Maya and Aztecs drank sweet chocolate beverages.

Answer: False

8. Cacao beans were once used as money.

Answer: True

9. The first chocolate bar was made in Switzerland.

Answer: False

10. All chocolate today is made using fair trade practices.

Answer: False

Short Answer:

11. What ingredient did Europeans add to cacao to sweeten it?

Answer: Sugar (and later milk)

12. What are two challenges the chocolate industry faces today?

Answer: Fair wages for farmers and sustainable farming practices

13. Why was chocolate originally important to the Aztecs?

Answer: It was used as currency and in religious rituals.

14. How did the Industrial Revolution impact chocolate production?

Answer: It allowed chocolate to be mass-produced, making it more accessible.

PRESENTATION

SCIENTIFIC INVENTIONS HAVE CHANGED OUR LIFE

We live in the age of science. People live, move and think in terms of science. Water, air, time and space have been conquered. Man has harnessed the forces of Nature, to his own use. Science has helped man to lead a better life than ever before. In all walks of life man has made wonderful progress. It has given us very swift means of communication transport. The steam engine, the motor car and now the airplane have conquered time and space. Man can now travel from one place to another in a short time. A journey of weeks and months is now performed in a few hours.

Then there are the telegraph, the telephone and the wireless. The wireless has made it possible to send messages to any part of the world in the twinkling of an eye. The steamers and the aero planes are all fitted with a wireless apparatus so that they can get timely help in danger. The radio has made the dull evenings at home bright. One can hear news, dialogues and speeches from the distant parts of the world while sitting at home. Television, the latest development of Wireless telegraphy, enables people to see the picture as well as hear voices.

Electricity, perhaps the greatest gift of science, has conferred on man many blessings. It is maid-of all work. It works the fans, cooks food, sweeps floors, irons clothes, air-conditions or warms the houses and offices, washes dishes, lights houses, streets and towns, runs trains and buses, works the mills and factories and diagnoses and cures diseases. Medical science has advanced a good deal. It helps the doctors to locate the disease. Terrible diseases like plague, small-pox, cholera, typhoid and malaria have been brought under control. Plastic surgery can change one's face and complexion. Underground drainage and sanitary schemes have minimized the chances of infection or spread of disease. Science has thus helped man in his fight against disease. The various inventions and discoveries of science have greatly added to the comforts of life.

Science has entered our life so powerfully that we have started thinking in a scientific way. It has all together changed our outlook on life. We now want to know the how and why of things. The age of superstitious beliefs is over. Scientific inventions have not all been for our good. Science has given man deadly weapons. The long-range guns, poisonous gases, atom-bombs and many other destructive weapons of warfare have made the life of man most insecure. Another war, and the whole world will be destroyed in a minute by nuclear weapon.

JOB APPLICATION & RESUME

R.Kishore,
B.E Robotics Engineering,
Kings Engineering College,
Chennai.

HR Manager,
Google,
Bengaluru-600123.

Respected Sir/Madam,

Subject: Application for the post of software developer.

This is with reference to your advertisement. For the Post of Software developer in your well established company. Kindly accept my application.

Here is a brief about myself. I have completed B.E in Robotics Engineering from Kings Engineering College I have secured 94% aggregate and passed my degree with Distinction.

During the course of my study I participated in various technical fests and won a gold medal in intercollegiate tech competition for creating an app from scratch. I am Confident that I have the requirement skills to excel in your Dynamic organization. Being a part of your company has been one of my dreams. You provide various development opportunities and I request you to give me an opportunity to learn and grow through role.

I will surely take active part in the development of the organization. I have enclosed my resume for your knowledge.

Thank you,

Yours sincerely,
R.Kishore

RESUME

Name:R.Kishore,
Email ID:kishore100307@gmail.com,

Address: 11/52 ,Chennai
Mobile No.:6382779684,

Objectives:

To become a part of the reputed organization and to utilize my skills for the development of the organization. As well as for my self-development.

Areas of Interest:

Web development, Game development, Cyber security, Cloud computing and embedded system development.

Education Qualification:

2028 passed B.E in Robotics Engineering with Distinction Studied in Kings Engineering College, Chennai. As a regular student in 2024 passes 12th in Bharathi Matriculation Hr. Sec. School with 154 cutoff

Achievement:

- Won the best project award in National level competition Conducted by TDLC In 2026.
- Won gold medal for being a college topper in UG.
- Served as school people leader in 12th Standard.

Project done:

Did a project on Agricultural Related Project for National level symposium conducted by Anna University in the year 2025.

Seminar attended:

Attended and presented a paper on latest trends in game-developing and international seminar MEGAMECH conducted by Anna University in the year 2026.

Personal profile:

Name:R.Kishore,
Date of birth: 26.06.2006
Marital status: Single
Nationality:Hindu
Community: BC
Languages known: Tamil, English and Greek.
Skills: Time management, problem solving, leadership, Hacking, Python, Frontend, Data Base.
Address of communication:6,Sri Devi Nagar,Alapakkam,Porur.

Reference:

Dr. Jegadeesh , Chairman ,
Google, Bangalore.
Mr. Madhesh Gopi, HR Manager,
S&M Infotech.

GENERAL INTERVIEW QUESTIONS

1. Tell me about yourself.

"I have a strong background in web development, with expertise in HTML, JavaScript, and website design. I've worked on projects where I built user-friendly websites for small businesses. I'm passionate about creating efficient and visually appealing web experiences, and I'm excited about this opportunity because I love to build web page"

2. Why do you want to work for this company?

"I admire Google for its innovative approach and strong reputation in industry. I appreciate your commitment to [mention a value, such as customer satisfaction or technological advancement]. I believe my skills in a well with your team's goals, and I'd love to contribute by my side"

3. What are your strengths and weaknesses.

Strengths: "One of my biggest strengths is my problem solving ability. In my previous role, I encountered a challenge and successfully resolved it by my solution. I'm also highly adaptable and always eager to learn new skills, which helps me stay up to date in the fast-changing tech industry." Weaknesses: "I used to struggle with time management when handling multiple projects, but I've improved by using productivity tools like Trello and setting clear priorities. Now, I can manage my workload efficiently without compromising quality."

4. Why should we hire you?

"I bring a combination of development skills, experience in industry, and a strong passion for this field. In my past work, I'm confident that my ability to create a web pages will make me a valuable asset to your team."

5. Where do you see yourself in five years?

"In five years, I see myself growing into a leadership role within the company, possibly mentoring new team members or contributing to strategic decision-making. I aim to continue improving my technical skills and take on more complex projects that challenge me. I believe this role will provide the right environment for that growth."

6. Describe a challenging situation at work and how you overcame it.

"In one of my projects, a client requested a last-minute redesign that would have delayed the entire launch. Instead of panicking, I proposed a compromise—keeping key design elements but making small adjustments to meet their vision. I worked closely with them to refine the details, and we met the deadline without sacrificing quality. The client was happy, and the project was a success."

7.Can you give an example of a time you went above and beyond your duties?

"In my previous job, a client needed urgent website updates over the weekend due to a product launch. While it wasn't required, I volunteered to make the updates because I knew it was important for their business. The client was extremely grateful, and my manager recognized my dedication, which later led to more leadership opportunities for me."

8.How do you handle stress and pressure?

"I stay calm by breaking tasks into smaller steps and prioritizing them. For example, during a high-pressure project deadline, I created a checklist to ensure I tackled the most critical issues first. I also take short breaks to stay refreshed, which helps me maintain focus and deliver high-quality work even under pressure."

9.Tell me about a time when you demonstrated leadership skills.

"During a group project, we faced a tight deadline and lacked clear direction. I took the initiative to assign tasks based on each team member's strengths and set up a tracking system to monitor progress. By doing this, we not only met the deadline but also improved team collaboration, and my manager commended me for stepping up as a leader."

10.Do you have any questions for us?

"Yes! I'd love to know more about the team I'd be working with. Can you tell me about the company culture and how success is measured in this role?"
