

SPOC Submission & Demand Report

01-Sep-2025 to 06-Sep-2025

Report Overview

Key Highlights

22

Total Submissions

From Sep 1st to Sep 6th

10

Current Demand

Open positions requiring supply

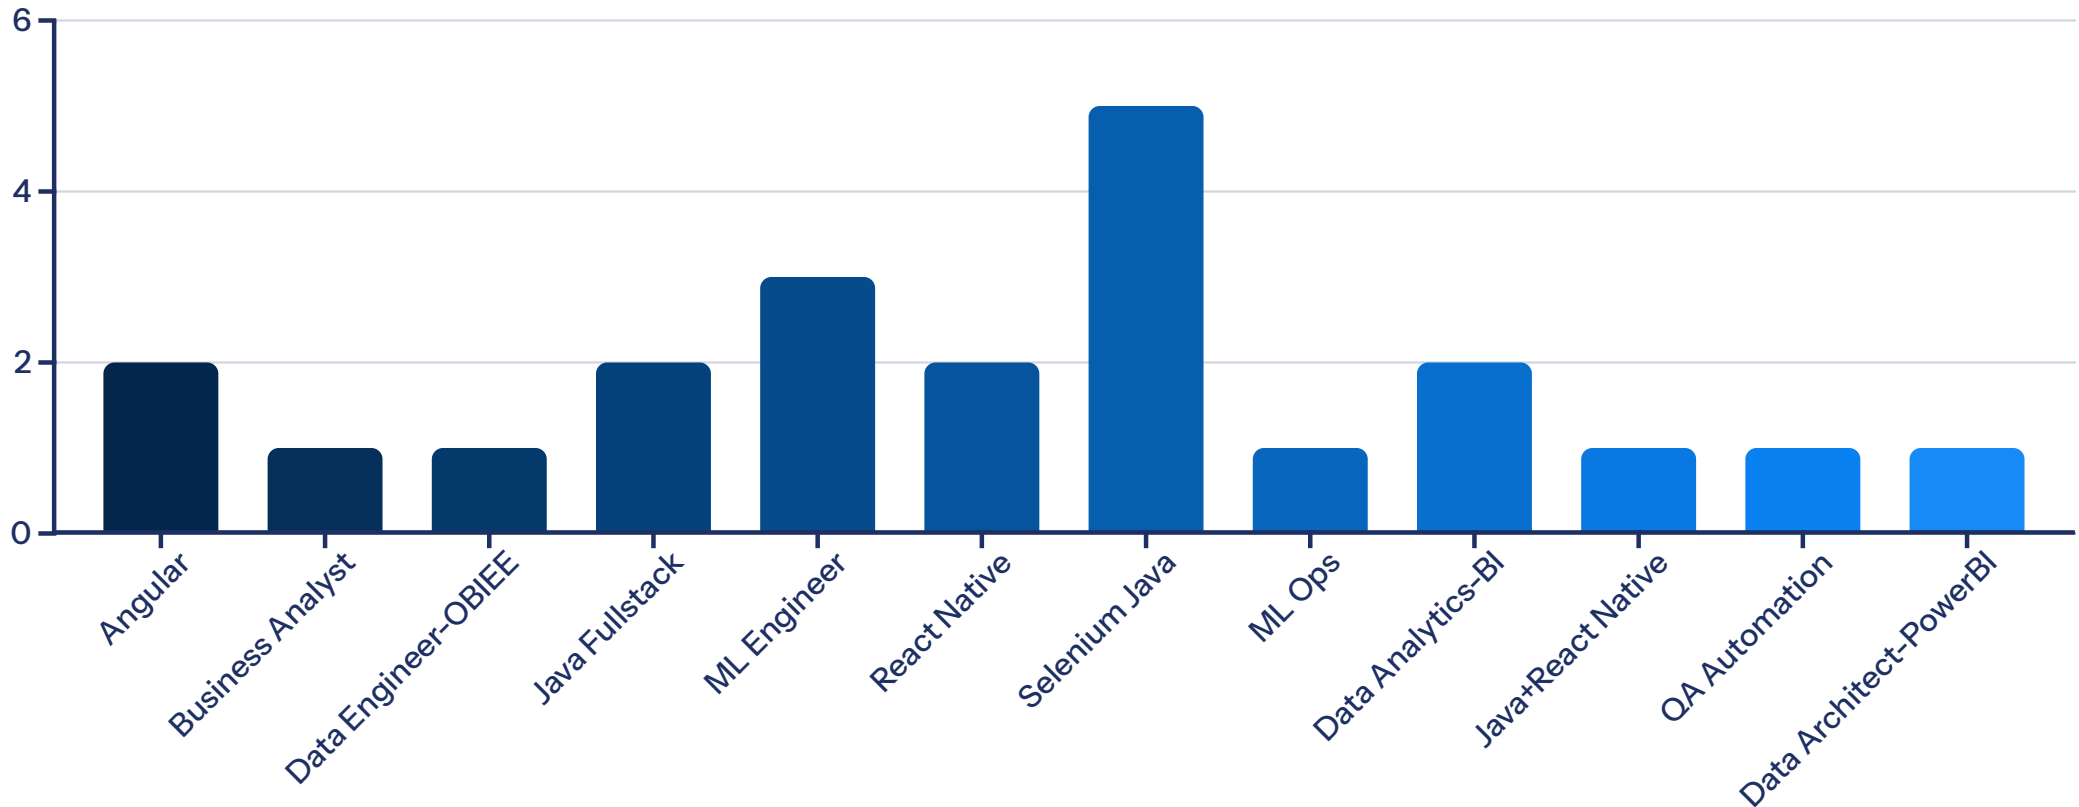

71

Daily Submissions

Total from Aug 18th to Sep 5th

Part 1

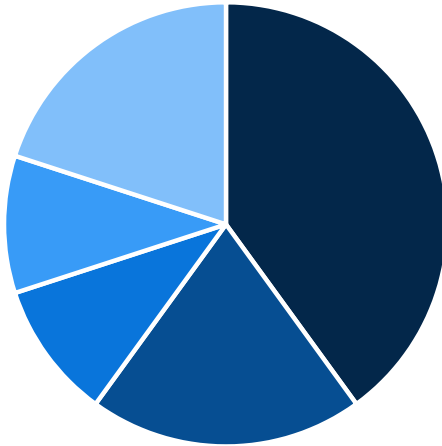

SPOC Submissions: By Skill & SPOC

Selenium Java leads in submissions, indicating strong activity in automation skills.

Part 2

Current Demand: By SPOC

■ Aarohi

■ Amit

■ Kavya

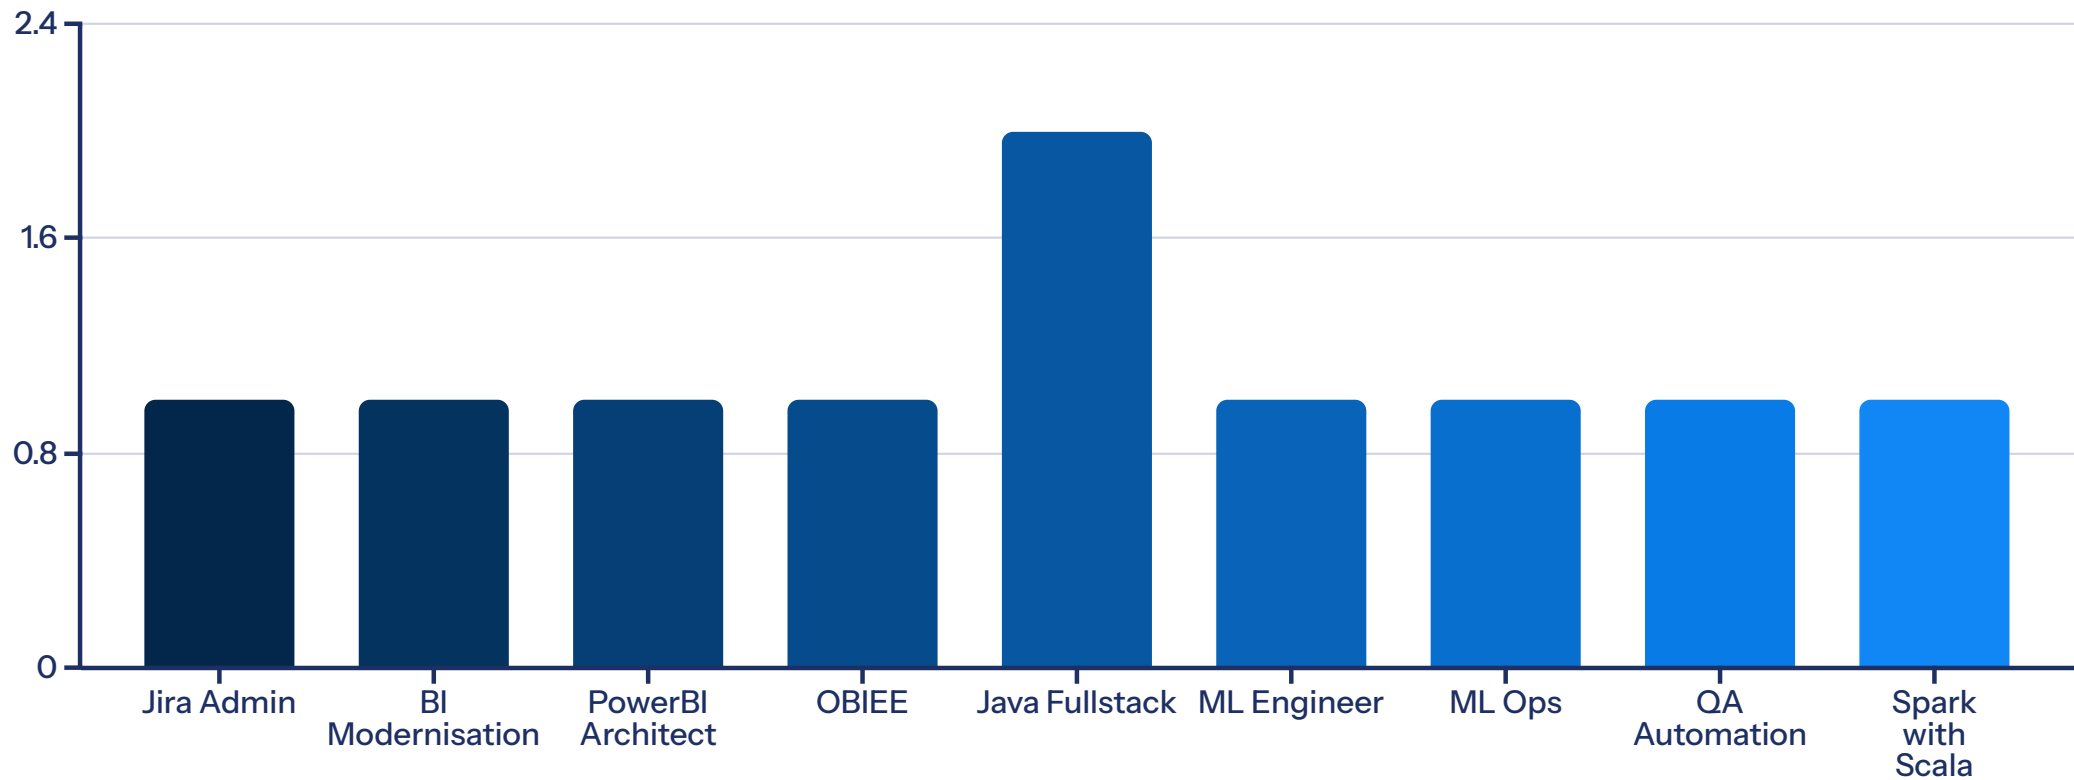

■ Lalit

■ Muskan

Aarohi accounts for the highest share of current demand.

Part 2

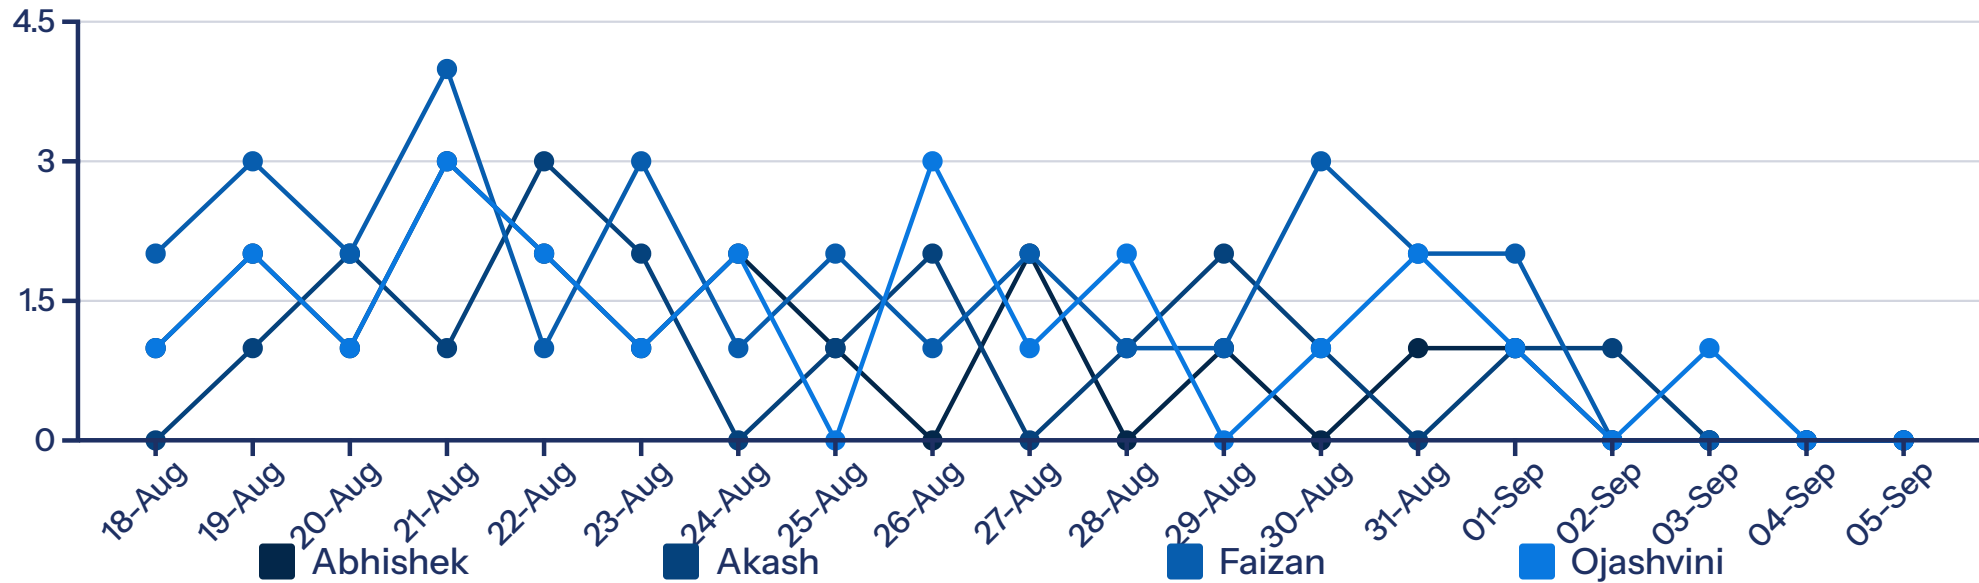

Current Demand: By Skill

Java Fullstack is the only skill with multiple open demands.

Part 3

Daily Submissions: Recruiters

Faizan has consistently high daily submissions, while activity dipped significantly towards the end of the period.

Analysis

Key Observations

High Submission in Selenium Java

Strong supply for automation roles.

Concentrated Demand

Aarohi's workload is high; Java Fullstack has consistent need.

Fluctuating Daily Submissions

Need for consistent output across all recruiters.

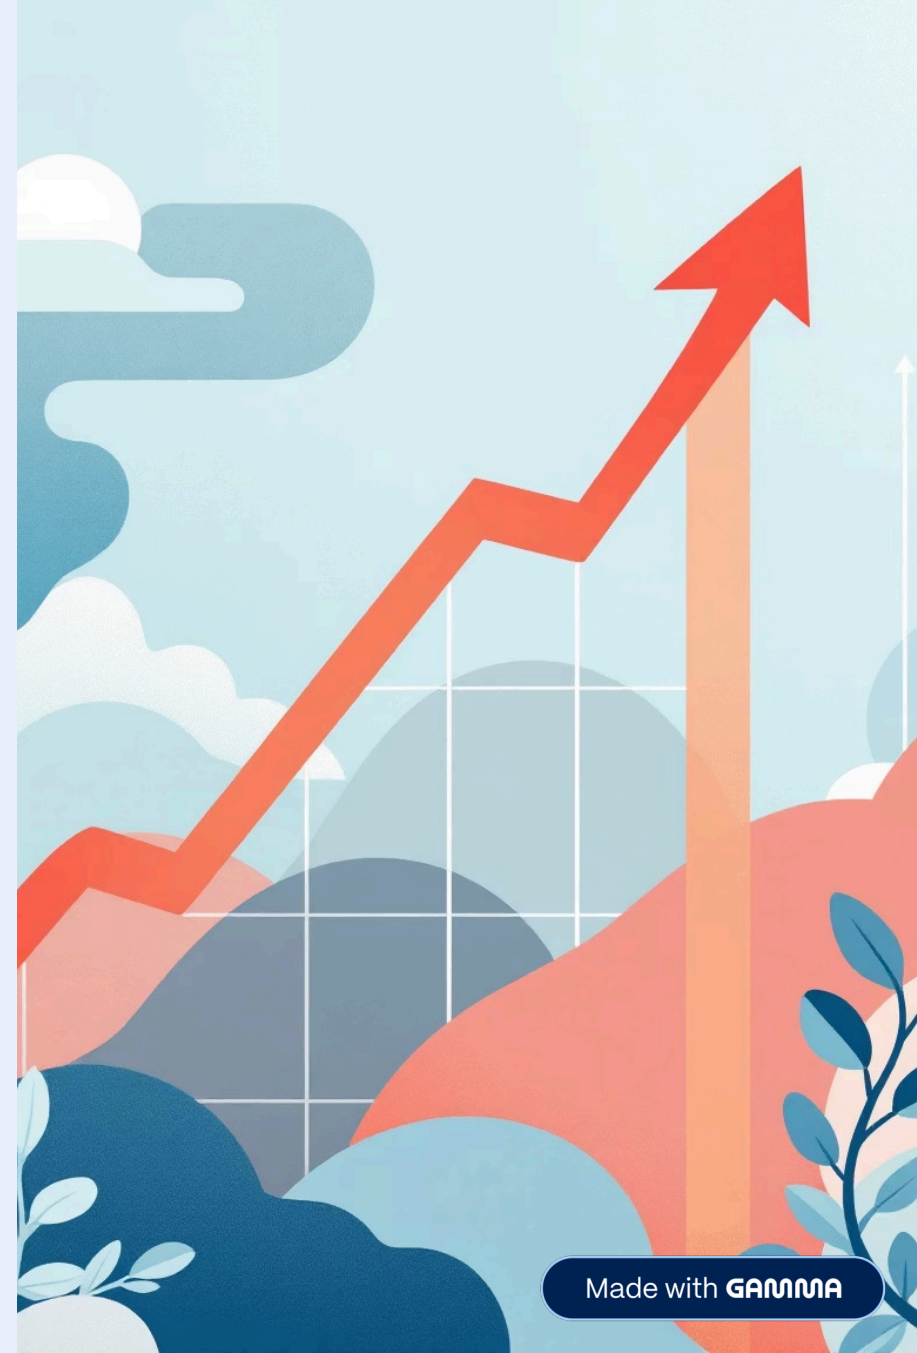

Observations: Supply vs. Demand

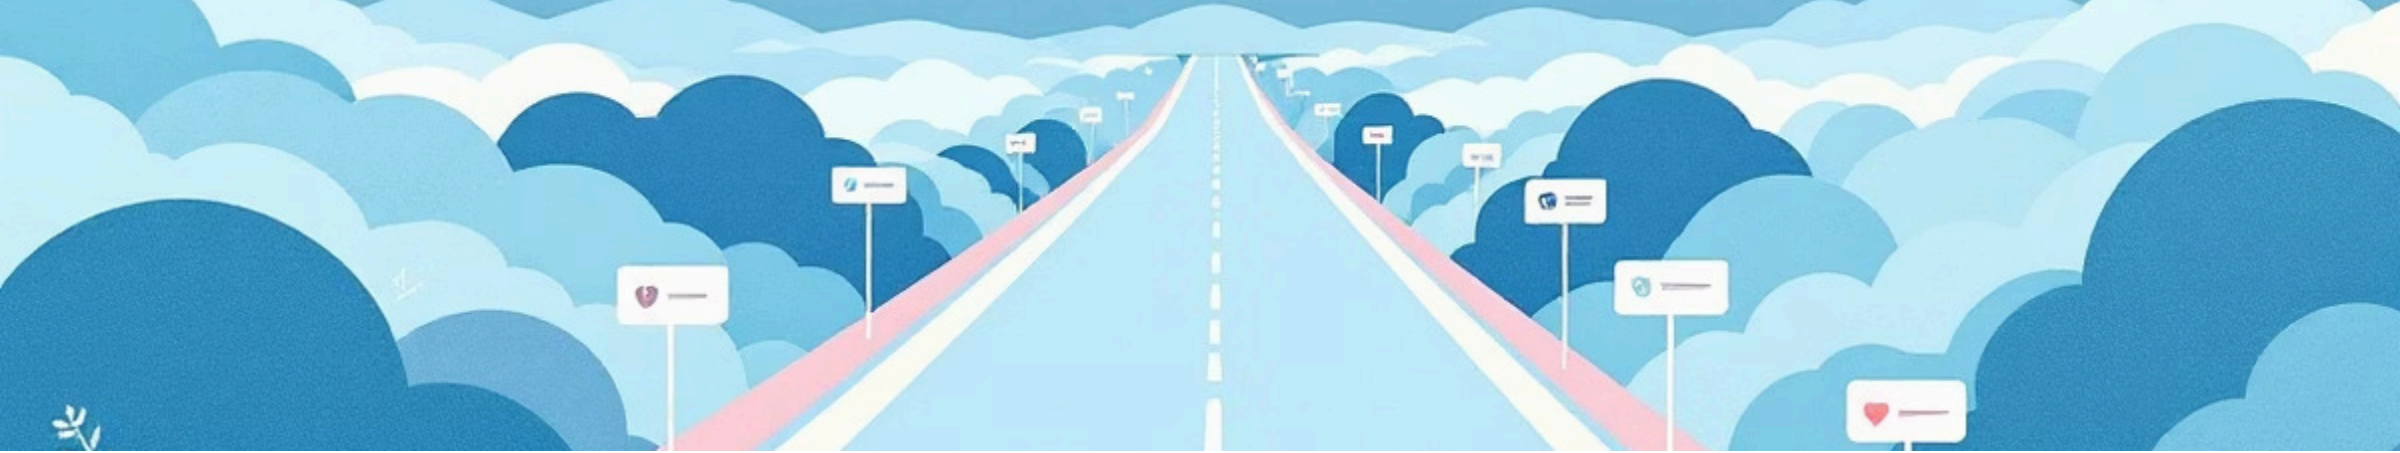

✓ Aligned Submissions

- Selenium Java submissions meet demand well.
- ML Engineer and ML Ops submissions are positive.

⚠ Disconnects

- Limited submissions for PowerBI Architect and BI Modernisation.
- Demand for Jira Admin and Spark with Scala needs more focus.

Strategic Actions

Next Steps

01

Focus on Key Skills

Prioritize sourcing for Java Fullstack & PowerBI Architect roles.

03

Align Submissions to Demand

Proactively identify candidates for high-demand skills.

02

Balance SPOC Workloads

Distribute demand more evenly to prevent bottlenecks.

04

Track Weekly Progress

Monitor these metrics consistently for ongoing optimization.

Driving Efficiency in Recruitment

Continuous improvement for optimal talent acquisition.
